DETAILED ACTION

REASONS FOR ALLOWANCE

Claim 31 is allowed.

The prior art does not teach or suggest an electrochemical energy storage device including all of the claimed features. The most pertinent art includes Kato et al. (EP 0 718903) in view of Branca et al. (U.S. Patent No. 5,814,405).

Both Kato et al. and Branca et al. do not teach or suggest: *"An electrochemical energy storage device comprising at least two electrodes, a first electrolyte, and a carrier material for said first electrolyte disposed between the electrodes, wherein said carrier material is a porous material having an inner pore structure defining pores with inner surfaces, wherein-second perfluorinated surface-active substance different from said first electrolyte is present on the inner surfaces of said pores solely in the form of a layer at least partially covering the inner surfaces of said pores, wherein said second substance does not fill said pores, wherein said first electrolyte is contained in said pores with the layer of the second substance being present on the inner surfaces, and wherein said inner pore structure consists essentially of a series of nodes interconnected by fibrils, said nodes generally aligned in parallel, being highly elongated and having an aspect ratio of 25:1 or greater."* as claimed by Applicant in claim 1.

For these reasons, the claims are allowed over the prior art. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ben Lewis whose telephone number is 571-272-6481. The examiner can normally be reached on 8:30am - 5:30pm.
